NEBULIZATION WITH HYDROGEN PEROXIDE SOLUTION DILUTED TO 0,5% vol.

With SANIBLASTER it is possible to carry out ordinary disinfections and decontaminations in accordance with the *Italian Ministry of Health communication no.5443, 22/02/2020*, about the prevention measures against COVID-19.

SANIBLASTER can efficiently nebulize Hydrogen Peroxide (bleach) diluted with water to 0,5% vol., it does not damage fabrics, metal, plastic, ceramic, natural stones, wood and electronic equipment.

At the end of the treatment it is possible to issue a declaration as pro of the disinfection. Please note that this declaration can be issued by a company entitled to carry out disinfections.
